IDENTIFIERS	*Graduate Record Examinations

ABSTRACT

The data presented in this report summarize the background characteristics of 234,796 college students who took the Graduate Record Examinations (GRE) Aptitude Test during 1975-1976 and who responded to at least one of the thirteen background questions. Response data are presented for the following questions: (1) whether or not GRE tests have been taken previously; (2) U.S. citizenship; (3) whether or not English is the primary language; (4) ethnic or racial background; (5) undergraduate enrollment of undergraduate institution attended; (6) public, private, or religious affiliation of undergraduate institution; (7) year bachelor's degree received; (8) most recent year in which graduate school was attended at least half-time; (9) public, private, or church affiliation of graduate institution; (10) graduate degree objective; (11) age; (12) undergraduate major; and (13) intended graduate major. Additional tables compare responses to two questions (such as ethnic group, age, degree objective), and cross tabulate verbal and quantitative scores on the GRE or sex of student with selected responses. PREFACE

During the 1975-76 year, all students who took the Graduate Record Examinations (GRE) Aptitude Test were asked a series of twelve "background questions" designed both to provide a basis for continuing GRE Program research and to allow for the collection and publication of data presumed to be of interest to the higher education community at large. These questions--which are reproduced as Exhibit 1--inquired as to the student's language, citizenship, ethnic background, size and type of undergraduate institution, degree objective, undergraduate and intended graduate field of study, and year of baccalaureate degree. By collecting this information from a large group of students--those approximately 235,000 students who take the GRE Aptitude Test each year--the GRE Board hopes to provide an ongoing and useful source of data about a significant group of people involved in the transition from undergraduate to graduate study.

Even as it publishes these data, the GRE Board recognizes several improvements which should be made in the presentation which will be made in data to be released for future years. It is recognized that certain tables would benefit from including cumulative percentages and/or row or column averages or percentages. These improvements--and others which we hope that readers of this report may suggest--will be given careful consideration prior to the publication of future reports.

In publishing these data, the GRE Board hopes it is providing a useful service to those who work with post-baccalaureate students and/or who are concerned about the process of transition from undergraduate to graduate study. The Board invites critical comments concerning the value of the data, or their mode of presentation, and those comments may be transmitted to the Board's staff at Educational Testing Service in Princeton, New Jersey.

Finally, the Board wishes to express its appreciation to Professor Lincoln Moses of Stanford University for his invaluable assistance in the decisions (while a member of the GRE Board) which led to the publication of this report and in the constructive efforts (after having ended his term of service) as to how these data might be presented and organized so as to be as useful as possible.

Lyle V. Jones
Chairman, GRE Board Research Committee

Richard Armitage
Chairman, GRE Board

INTRODUCTION*

In reviewing this report, readers are urged to recognize the limitations of data based solely upon GRE test-takers and the dangers in interpreting these data as representing something more than (or different from) that which they truly are. These are not data for all baccalaureate degree recipients, nor for all graduate school applicants, nor all first-time graduate school enrollees, none of which are readily available on a national basis. Rather, these are data on a large (and to some extent self-selected) subset of each of those groups, including as well some who fall into none of those groups. The majority of GRE test-takers included in these data are seniors, graduate school applicants, and (by now) first-time graduate school enrollees. Many GRE test-takers, however, are not seniors, will not apply to graduate school, or will not enroll; other people who are seniors, applicants, or enrollees will not take the GRE.

Most simply, the data included in the following tables are based on those 234,796 people (called "test-takers" in the following discussion) who (1) registered to take the GRE through usual registration procedures at ETS prior to one of the six regularly scheduled national administrations during 1975-76, and (2) who actually took the GRE Aptitude Test (V and Q) at the administration for which they registered, and (3) who responded to at least one of the twelve "background questions" which students are requested to answer at the time they register for the test. Students who took the GRE Aptitude Test at a national administration but who used the "walk-in registration" option (approximately 10,000 people) are not included in these data; neither are those who took the GRE Aptitude Test at a GRE Special Administration in one of six cities throughout the United States or at a GRE Local Administration for enrolled graduate students. At the same time, students who may have registered for the GRE but did not actually take the Aptitude Test have not been included; these students may have taken only a GRE Advanced Test, or may have been absent from the test administration for which they originally registered. Finally, 43,035 students (15.49% of the 277,831 students who both registered for the GRE and took the Aptitude Test) did not answer any of the background question on which these data are based, and have not been included in these analyses.

Because these data are based on test-takers, care must be taken in drawing conclusions beyond those obvious on the face of the data. For example, not all departments in a discipline will require or recommend the GRE Aptitude Test of its applicants; in some instances, departments will require the GRE only of those applicants about whom it has questions concerning their potential for success in graduate study. Thus, the average (mean) GRE score for those students who took the Aptitude Test and responded that they intend to major in any given discipline is <u>not</u> equivalent to the average GRE score that would have been earned if <u>all</u> applicants to that discipline had taken the test, nor can it safely be judged to represent (when compared with other data from this report) the relative aptitude of students planning to study in or studying in a given field.

---

* The authors also wish to express their appreciation to Martha Stocking and Judith Pollack-Ohls, who were responsible for computer programming.

For several reasons, care should be taken in interpreting data based on groupings of disciplines reported here. First, one must recognize that the GRE code list for disciplines includes 98 disciplines plus an option for those disciplines not included in the list and for the student who is undecided; students studying in disciplines not shown or who do not recognize the name of their discipline will choose "Not in Above" and this entry accounts for approximately 10,000 respondents. Second, within the 98 disciplines listed are four "general" responses: Other Humanities, Other Physical Sciences, Other Social Sciences, and Other Biological Sciences; approximately 40,000 respondents (17% of total respondents) chose one of these general entries. Finally, in order to facilitate reporting, each of the four major discipline groups (Social Sciences, Physical Sciences, Humanities, and Biological Sciences) was further divided into subgroups each consisting of from three to nineteen disciplines; those reading this report should take care to note the specific disciplines which have been included in each major group and subgroup, and should take particular care in interpreting data for subgroups which contain one of the four "general" discipline responses. The listing of disciplines within major groups and subgroups appears as Exhibit 2.

Students completed the "background questions" at the time at which they registered for the GRE, although response to the questions was optional and did not effect a student's ability to successfully register for the Aptitude Test. As noted above, however, students who failed to answer any of the background questions have not been included in the 234,796 respondents on whom these data are based.

Despite these limitations, there appear to be several points worth noting which can be observed in the data and tables. Tables 1 through 13 present simple tabulated responses for each of the thirteen questions included in this report. In these tables, the Total Response row shows the number of test-takers (234,232 for Table 1) who answered the question on which the table is based; the denominators for the percentages shown for each response (89.22% for "No" and 10.78% for "Yes") are thus the 234,232 test-takers who answered the appropriate question. In these tables, the last row of each table (No Response) gives the number of test-takers who did not answer this individual background question. The non-response rate for each question is that number of non-respondents (564 for Table 1) divided by the appropriate base (e.g., 234,796 questionnaire respondents for Table 1; 213,245 U.S. citizens for Table 4) shown in a footnote for each table.

From Table 4 it can be seen that non-white test-takers represent 12.7% of the total respondents, with the number of Black test-takers (13,433) greater than that of all other non-white groups combined (12,401). From Table 7, one discovers that 18.3% of the respondents reported receiving their baccalaureate degree in 1971 or an earlier year, and 7.3% reported receiving their baccalaureate degree in 1966 or an earlier year. And, from Table 11, it can be seen that 38.6% of the respondents during the 1975-76 academic year were twenty-five or more years old.

In Tables 14-24, responses to two questions (such as undergraduate college type, ethnic group, age, or degree objective) are cross-tabulated with a bordering row and column for non-response. The main body of these tables shows those test-takers who gave a response to both classifying questions (e.g., English facility and citizenship in Table 15). The bordering column gives non-responses for the question that determines the columns (e.g., citizenship in Table 15) according to the responses to the question that determines the rows (e.g., English facility); in Table 15, 112 test-takers who indicated English as their best language failed to respond to the question concerning citizenship. The denominators for computing the non-response rates are then the row totals including non-respondents; the 112 represents .05% of the 214,367 (214,255 + 112) test-takers with best facility in English. The entries in the "No Response" row were computed in a similar fashion.

At the intersection of the bordering row and column is the number of test-takers (4,078 in Table 15) who did not respond to either classifying question. The non-response rate for these "double non-responders" is that number of non-respondents divided by appropriate base (e.g., either U.S. citizens as in Table 15 or all questionnaire respondents as in Table 14). The appropriate base can be determined by adding those who responded to both classifying questions (227,916 in Table 15), those who failed to respond to the column question (144) and the row question (2,657), and those who responded to neither question (4,078).

In Table 20, one sees large racial differences in the age of GRE test-takers, with greater proportions of Indians, Blacks, Mexican-Americans and Latin-Americans than whites exceeding age 30. And, in Tables 14 and 19, one learns that there is apparently no important relation between undergraduate field and propensity to retake the GRE nor are there racial differences in the GRE retake rate. Table 18 shows two notable features: the high (77.1%) proportion of Mexican-American test-takers and the low (61.5%) of Black test-takers who reported attending public undergraduate institutions and the high (23.2%) proportion of Black test-takers and the low (9.1%) proportion of Asian-American test-takers who reported attending church affiliated institutions. It should be noted that, in Table 24, the "No Response" totals for the year of last graduate study include only those respondents who indicated that they have attended graduate school but did not provide the year in which they most recently attended.

In Tables 25-36, data from several questions have been combined to produce six pairs of tables, each pair containing one table based on test-takers who indicated the doctorate or beyond as their eventual degree objective and another based on test-takers who responded that their eventual degree objective was a master's or intermediate degree. Since these twelve tables are based on test-takers' eventual degree objective (doctoral vs. non-doctoral study), the 9,728 test-takers who did not respond to the question on degree objective are not included in any of them. In each table, respondents were classified by

their stated undergraduate major area and their intended graduate major area, and the data in the cells are based on those respondents who fit each undergraduate/graduate pairing (e.g., those who majored in arts but anticipate doing graduate study in the biological sciences).

Those students who provided information regarding their intended graduate major but did not respond to the question on undergraduate major are the cases on which the "No Response" bottom row of each of these tables is based, while those students who responded to the question on undergraduate major but not the question on graduate major are the cases on which the right-hand "No Response" column is based. In Tables 25 and 26, the numbers of people who responded to a row but not a column question (or a column but not a row question) are shown in the "No Response" borders, which are presented in the same format and computed in the same manner as the "No Response" borders in Tables 14-24. For Tables 27-36, no responses to the row or column question has simply been treated as another possible response, and the appropriate proportion or mean score appears in the cell. For example, in Table 27, the mean GRE-Verbal score for those planning doctoral study in arts who did not respond to the question concerning their undergraduate major field is 513, while the mean GRE-Verbal score for those planning doctoral study who did not respond to the question asking for the field in which they plan to study but who majored in arts as undergraduates is 566.

The data in the cells in Tables 25 and 26 show the absolute number of test-takers in each cell, and include all students who responded to the question on graduate degree objective. Since, by definition, all test-takers have an earned GRE-Verbal and GRE-Quantitative score, the numbers of test-takers from which the cell entries in Tables 27-28 (mean GRE-Verbal scores) and Tables 29-30 (mean GRE-Quantitative scores) were computed are identical to the numbers of test-takers shown in each cell in Tables 25 and 26 for doctoral and predoctoral study, respectively. On the other hand, an additional response was necessary to permit inclusion of a test-taker in the cells of Tables 31-36: cell entries in Tables 31 and 32 (the proportion of test-takers who also responded to the question concerning six, cell entries on Tables 33 and 34 (the proportion of test-takers who are non-white) are based only on those test-takers who also responded to the question concerning ethnic group, and the cell entries in Tables 35 and 36 (average year of receipt of the baccalaureate degree) are based only on those test-takers who also responded to that question. Because of the fact that non-respondents to certain questions cannot be included in the data on which the cells of these tables are based, the numbers of test-takers shown in each cell in Tables 24 and 25 are the upper bounds on the numbers of test-takers on whom the data in the cells in Tables 31-36 have been computed.

Table 25 shows marked persistence of general area of study in the transition from undergraduate to doctoral study, with 80% or more of the graduate students coming from test-takers with the same undergraduate area in arts, other humanities, behavioral sciences, biologi-

cal sciences, physical sciences, engineering, and mathematical sciences. In each of the other four areas--education, other social sciences, health, and other applied biological sciences--there are two areas (e.g., education and behavioral sciences for education) which furnish about 70% or more of the doctoral applicants. Table 26 shows that similar, but less marked, tendencies apply for applicants to "less than doctoral study."

Table 27 presents data concerning the average GRE-Verbal scores of those test-takers entering doctoral work by undergraduate major area and intended graduate major area. Recognizing the dangers of over-interpretation of data concerning average test scores cited above, it is nonetheless interesting to note that those test-takers who intend to enter doctoral work in education, arts, engineering, other social sciences, and other applied biological sciences from a different undergraduate area of study tend to have higher GRE-Verbal scores than entrants to those fields who did their undergraduate work in the same field. At the same time, those test-takers from undergraduate studies in education, arts, engineering (and to a lesser extent other social sciences and physical sciences) who intend to move to other graduate fields tend to have higher GRE-Quantitative scores than their undergraduate colleagues who remain in that area for post-baccalaureate work.

Looking at Table 29 for GRE-Quantitative scores, one sees a slightly different pattern in which mathematics, engineering, and other biological sciences tend to "send" test-takers with the highest GRE-Quantitative scores into their own field for doctoral study, while education and other social sciences tend to "send" test-takers with the highest GRE-Quantitative scores into other fields. In each instance--GRE-Verbal and GRE-Quantitative--findings for test-takers planning less than doctoral study (Tables 28 and 30) are similar to those for test-takers planning doctoral study or beyond.

Tables 37 and 38 show test-takers' mean GRE-Verbal and Quantitative score by the size and type of undergraduate institution most recently attended, and are based on all 234,796 questionnaire respondents. As with Tables 27-30, a non-respondent to one of the classifying questions (size or type of undergraduate institution) has simply been included in the appropriate cell. For example, from Table 37, the mean GRE-Verbal score of those test-takers who attended a public undergraduate institution but did not respond to the question concerning the size of their undergraduate institution is 473.

In Tables 39-43, the data from several questions have been combined to produce five tables. Data show the percentage of test-takers who indicated each discipline as their intended graduate or undergraduate major who were female (Table 39), who were non-white (Table 42), and who attended public institutions (Table 43), as well as the average GRE-V (Table 40) and GRE-Q (Table 41) scores which those test-takers achieved. Students who did not respond to the classifying question (e.g., sex, race, or type of undergraduate institution) have not been included in the individual table based on that

question, although students who did not respond to the question concerning their undergraduate or intended graduate majors are included in a non-response row at the end of each table. Thus, from Table 39, 23.5% of the test-takers with an undergraduate major in chemistry were female, and 26.5% of the test-takers who intend to do graduate study in chemistry are female; 51.42% of those who did not respond to the question concerning undergraduate major are female, and 52.70% of those who did not respond to the question concerning intended graduate major are female. Finally, it should be noted that the percentages shown in Line VIII (Total) for each of these tables are based only upon those students who responded to the undergraduate or graduate major questions and do not include those shown in Line VII (No Response).

EXHIBIT 1

Background Information Questions

Your answers to these questions will not affect your score in any way. They will be used for research and in group statistics to describe GRE candidate populations; individual responses will not be communicated to any institution.

In the area on your registration form titled "Background Information Questions," indicate your response to each question. We hope that you will answer all questions. However, you are free to omit any question you do not wish to answer.

A. Have you previously taken one or more GRE tests?
- **(1) No**
- **(2) Yes—took the test(s) on or prior to September 30, 1975**
- **(3) Yes—took the test(s) more recently than September 30, 1975**

If your answer to question A is (3) and your responses to the rest of the questions would be the same as they were before, you need not answer the questions again.

B. Are you a citizen of the United States?
(1) Yes (2) No

C. Do you communicate better in English than in any other language?
(1) Yes (2) No

Omit question D if you are not a United States citizen.

D. How do you describe yourself?
- **(1) American Indian, Eskimo, or Aleut**
- **(2) Black or Afro-American or Negro**
- **(3) Mexican-American or Chicano**
- **(4) Oriental or Asian-American**
- **(5) Puerto Rican**
- **(6) Other Hispanic or Latin-American**
- **(7) White or Caucasian**
- **(8) Other**

E. Approximately how many full-time undergraduate students attend the school from which you received or will receive your bachelor's degree?
- **(1) Fewer than 1,000**
- **(2) 1,000 - 4,999**
- **(3) 5,000 - 9,999**
- **(4) 10,000 - 19,999**
- **(5) 20,000 or more**

F. Which of the following best describes your undergraduate institution?
- **(1) Public**
- **(2) Private—no church affiliation**
- **(3) Private—church affiliation**

G. In what year did you receive or do you expect to receive your bachelor's degree?
(Please blacken the spaces on your registration form corresponding to the last two digits of the year.)

H. Referring to the Major Field Code List below, find your undergraduate major field of study. Blacken the spaces for that field's code number. If your major is not listed, select one of the following codes and blacken the corresponding spaces:

10 Other Foreign Languages
98 Other Humanities
80 Other Social Sciences
30 Other Biological Sciences
60 Other Physical Sciences
02 Not included in above categories

I. Which of the following best describes the graduate institution you most recently attended or currently attend on at least a half-time basis?
- **(1) I have never attended graduate school or have attended graduate school on less than a half-time basis only. (Skip to K.)**
- **(2) Public**
- **(3) Private—no church affiliation**
- **(4) Private—church affiliation**

J. In what year did you last attend graduate school on at least a half-time basis?
(Blacken the spaces on your registration form corresponding to the last two digits of the year; if you have not attended graduate school, leave this question blank.)

K. What is your eventual graduate degree objective?
- **(1) Nondegree study**
- **(2) Master's (M.A., M.S., M.Ed., etc.)**
- **(3) Intermediate (such as Specialist)**
- **(4) Doctorate (Ph.D., Ed.D., etc.)**
- **(5) Postdoctoral study**

L. Referring to the Major Field Code List below, find the field in which you plan to do your graduate work. Blacken the spaces for that field's code number. If your intended major is not listed, or if you are undecided, select one of the following codes and blacken the corresponding spaces:

10 Other Foreign Languages
98 Other Humanities
80 Other Social Sciences
30 Other Biological Sciences
60 Other Physical Sciences
02 Not included in above categories

TABLE 1
QUESTION A. HAVE YOU PREVIOUSLY TAKEN ONE OR MORE GRE TESTS?

	N	%
NO	208980	89.22
YES	25252	10.78
TOTAL RESPONSE	234232	100.00
NO RESPONSE	564	0.24*

* % BASED ON 234796 QUESTIONNAIRE RESPONDENTS

TABLE 2
QUESTION B. ARE YOU A CITIZEN OF THE UNITED STATES?

	N	%
YES	213245	92.48
NO	17329	7.52
TOTAL RESPONSE	230574	100.00
NO RESPONSE	4222	1.80*

* % BASED ON 234796 QUESTIONNAIRE RESPONDENTS

TABLE 3
QUESTION C. DO YOU COMMUNICATE BETTER IN ENGLISH THAN IN ANY OTHER LANGUAGE?

	N	%
YES	214367	94.00
NO	13693	6.00
TOTAL RESPONSE	228060	100.00
NO RESPONSE	6736	2.87*

* % BASED ON 234796 QUESTIONNAIRE RESPONDENTS

TABLE 4
QUESTION D. HOW DO YOU DESCRIBE YOURSELF?

	N	%
AMERICAN INDIAN, ESKIMO OR ALEUT	884	0.43
BLACK OR AFRO-AMERICAN OR NEGRO	13433	6.58
MEXICAN-AMERICAN OR CHICANO	2738	1.34
ORIENTAL OR ASIAN-AMERICAN	2573	1.26
PUERTO RICAN	1259	0.62
OTHER HISPANIC OR LATIN-AMERICAN	979	0.48
WHITE OR CAUCASIAN	178313	87.35
OTHER	3968	1.94
TOTAL RESPONSE	204147	100.00
NO RESPONSE	9098	4.27*

* % BASED ON 213245 U.S. CITIZENS

TABLE 5
QUESTION E. HOW MANY FULL-TIME UNDERGRADUATE STUDENTS ATTEND THE SCHOOL FROM WHICH YOU RECEIVED OR WILL RECEIVE YOUR BACHELOR'S DEGREE?

	N	%
FEWER THAN 1,000	20578	9.21
1,000 - 4,999	67488	30.20
5,000 - 9,999	43467	19.45
10,000 - 19,999	47673	21.33
20,000 OR MORE	44289	19.82
TOTAL RESPONSE	223495	100.00
NO RESPONSE	11301	4.81*

* % BASED ON 234796 QUESTIONNAIRE RESPONDENTS

TABLE 6
QUESTION F. WHICH OF THE FOLLOWING BEST DESCRIBES YOUR UNDERGRADUATE INSTITUTION?

	N	%
PUBLIC	150128	65.36
PRIVATE - NO CHURCH AFFILIATION	38960	16.96
PRIVATE - CHURCH AFFILIATION	40623	17.68
